H. W. Burgess Takes Exceptions to Statement in Evening Banner

Editor of the Banner:—It was reported in your paper that the new village team are 8 and 7 years old. I would like to say the colt is 4 years old and the old mare is 12 past.

Yours truly,
H. W. Burgess.
Bennington, Vt., May 6, 1921.

DRY LEADER PREDICTS 20 YEARS' WARFARE

In the Meanwhile the Anderson Salary, Like Tennyson's Brook, Will Meander On.

It will take twenty years at least, according to William H. Anderson of the Anti-Saloon league, to enforce prohibition in New York. Mr. Anderson looks forward to the long war hopefully, however, even cheerfully the New York World declares. While it goes on he will not be out of a job. This is a minor consideration, perhaps, but not to be ignored.

"If we make good in the next two or three years," Mr. Anderson goes on to say, "then the rest of the fight will be a winning fight all the way." This is indeed a pleasant prospect for which we are being gently prepared. The war is to begin, it appears, with a sharp two-year campaign, during which the city and state police leave all laws except the Mulligan-Gage act to enforce themselves, followed by a guerrilla struggle wherein home brew and civil rights are to perish together. At the end of the twenty years, if the city and state are not yet dry—and they won't be—the Anti-Saloon league will have to keep on raising money and paying its officers as usual. Why should this ideal condition ever exist?

"Civil liberty under law," Mr. Anderson warns further, "is endangered by anarchy with respect to any particular law." True. But just now, as it happens, civil liberty is being endangered by an attempt to enforce an unpopular prohibition law passed at the dictation of the Anti-Saloon league.

PLANNING COMMISSION

Troy Council Passes Ordinance Providing for Board of Seven.

Troy, N. Y., May 7.—The Kappa ordinance providing for the appointment of a city planning commission of seven members by the mayor was unanimously adopted by the common council Thursday night. Alderman Kappa, in reporting the measure from the law and legislation committee, stated that Troy was taking a big step forward. He believed the mayor would appoint good men on the commission.

THE CONE STUDIO

North Adams

Following the example of Hebrew people in other cities, several prominent Jewish business men of the city Friday afternoon declared their intention of interviewing the trustees of the public library for the purpose of requesting the withdrawal of the files there of Henry Ford's "Dearborn Independent" an anti-Jewish organ edited and published by the automobile magnate.

The paper has been on file here for some time past and though apparently little attention was given the matter here the attitude of Jewish people in several of the larger cities in the country in demanding the exclusion of the paper has aroused unusual interest and several recent articles published have created such indignation that immediate steps were taken to withdraw the paper from the files in many of the smaller places, this city included.

Mrs. Katherine Lanzan, 79 years old, a well-known resident of this city died Wednesday night at the home of her daughter, Mrs. Joseph Houser. The funeral will take place today and burial will be in Pittsfield, Mass.

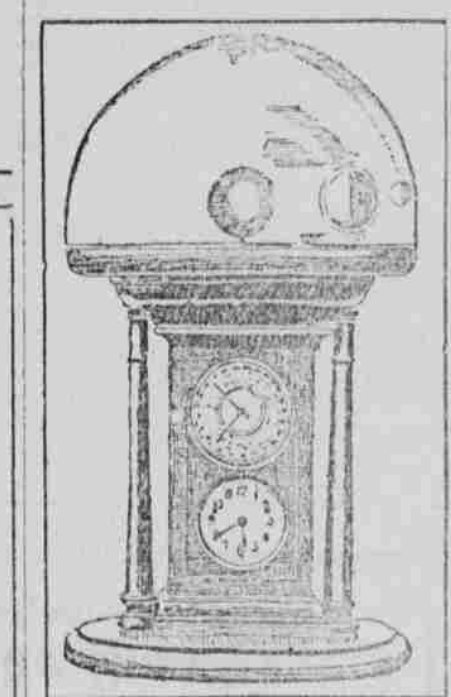

Mrs. Beatrice Fellows, 24 years old, wife of Robert Fellows, died Wednesday afternoon at the home of her uncle, B. H. Fairbanks. She was born in this city, a daughter of Mr. and Mrs. George Hubbard, and always resided here. Surviving her are her husband and two small children, her father, two brothers, Herbert and Crawford Hubbard of Pittsfield, and one sister, Mrs. Burton Bradley of Pittsfield. The funeral will take place this afternoon at 2 o'clock in St. John's church. Rev. Mr. Murray will officiate. Burial will be in Hillside cemetery.

DOES MORE THAN TELL TIME

Movements of Sun, Moon and Earth Accurately Represented by New Astronomical Clock.

What is said to be an improved astronomical clock represents the ideas and unrelenting work of an ingenious Chicagoan, Michael Bulka. This clock exemplifies and illustrates the movements of the earth and moon around the sun, with the moon swinging about the earth. These various movements, in concert with the actual happenings, typify the four seasons of the year.

In a glass dome surrounding the clock are three globes representing the sun, earth and moon. This group shows how the sun illuminates the earth and moon; how the earth revolves around its axis every 24 hours, giving us both day and night; how

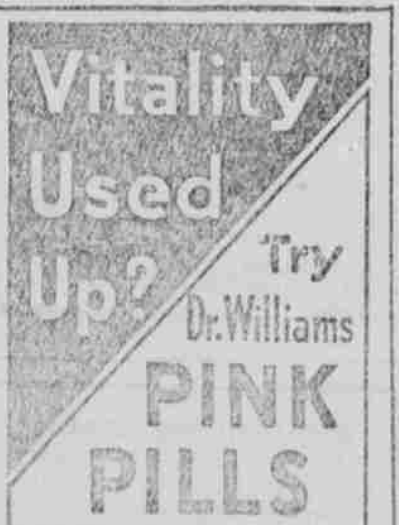

Astronomical Clock.

the earth travels around the sun, giving us the four seasons of the year; how the moon revolves around the earth, thus changing its illuminated area; and how the earth and moon together revolve around the sun, giving us the 12 months in the year. The eclipses of the sun and moon, when they occur, are plainly depicted by the mechanism.

The globes representing the sun and moon have been coated with phosphorus preparation which radiates rays of light. The clock has two dials indicating time of the year and of the day.—Scientific American

Musical Comedy.

and cost \$26,000,000.

The largest rats in place on record was served recently to patrons of the automobile row at Turlock, Calif. The immense pile weighed 158 pounds and 75 pounds of rats were used in its composition.

Opals Found in Few Places.

There are known only five gem-opal regions in the entire world. For 500 or 600 years, a deposit in a remote section of northern Hungary has been mined by local peasants. The removal of opals from this region ceased about 20 years ago. For the most part, stones from northern Hungary are milky white.

World's Largest Reservoir.

The largest irrigation reservoir anywhere is the great Elephant Butte dam, which stores water under the world-famous Assuan dam on the Nile. This big dam, built in the Grande above El Paso, at a cost of \$10,000,000, holds water in a reservoir 10 miles long and 100 feet deep. It is the most important of its kind in the world. National Geographic Society Bulletin.

Cold Causes Stale Bread.

Prof. J. H. Kell of Amesbury, has found that low temperature makes bread stale. At 130 degrees F., it was fresh after 48 hours, but when the temperature was reduced to 122 degrees the bread began to grow stale.
